

## **INTRODUCTION**

The 2010 **DIRECTORY IRON AND STEEL PLANTS** is the seventh edition published by the Association for Iron & Steel Technology. The **DIRECTORY** was first published in 1916 by Steel Publications Inc. In 1972, the Association of Iron and Steel Engineers acquired the **DIRECTORY** and published it through 2003. The **DIRECTORY** format has gradually evolved throughout its long history. Today, Sections I and II provide complete personnel and facility information for North American steel companies, including integrated, minimill and specialty producers. Section III lists suppliers of equipment, products and services to the iron and steel industry. Geographical indexes are included for each of the three sections.

AIST would like to thank the many companies that assisted in the compilation of information for the 2010 edition. If your company is not included and you feel it should be, contact us at [directory@aist.org](mailto:directory@aist.org), and we will consider your listing for the next edition.

Every effort has been made to keep the **DIRECTORY** useful and informative, including a searchable CD-ROM. We welcome any suggestions for improvement.
